WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

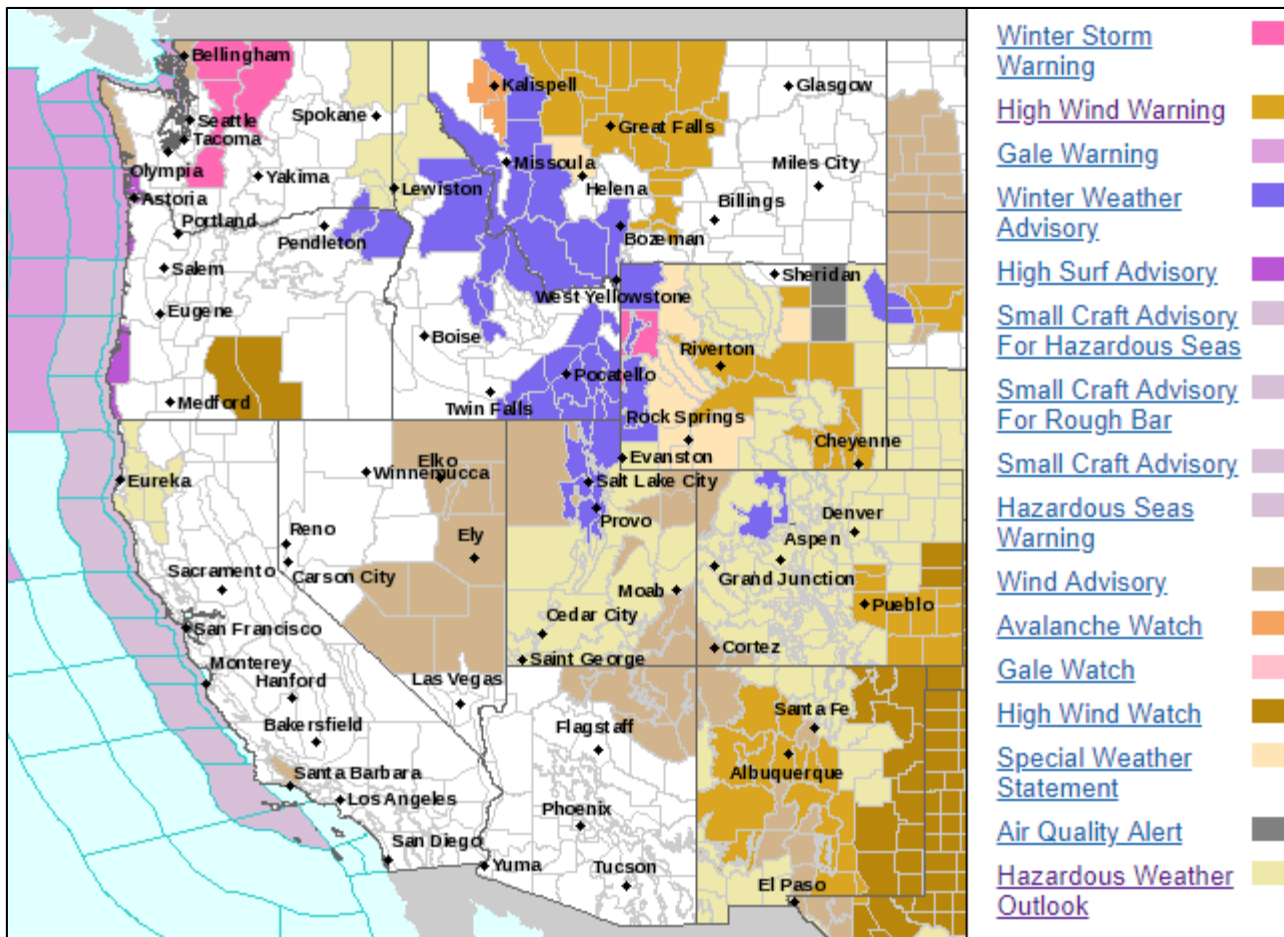

- A series of low pressure troughs will continue to produce unsettled and sometimes wet weather for the next week and beyond.
- N-NE winds and low Relative Humidity (RH) will develop from the western Cascade-Sierra slopes to the Coast Range today, with peak gusts to 25-30 mph. The winds will diminish tonight and RH will increase.
- The next trough will bring rain and mountain snow to all but the SE corner of the geographic area Friday and Friday evening. SE-SW winds will increase Thursday afternoon through Friday, with the peak gusts 40-50 mph in the Weed and Shasta Valley area early Friday and 35-45 mph in our eastern areas Friday afternoon.
- More low pressure troughs will bring rain and mountain snow to the region Sunday into early Monday, and again next Friday. Another system is expected to approach our NW areas late Tuesday and Wednesday, but at this time models do not bring rain inland.
- Snow levels will lower to around 3,500 feet in the north and 5,000 feet in the south with most of these troughs.
- During periods of heavier precipitation, debris flows in recent fire scars are possible. The combination of saturated soils and strong winds could topple trees.

SOUTHERN CALIFORNIA

- Gusty north winds can be expected to continue in a few areas this morning. These winds will transition to the northeast, bringing breezy conditions to areas prone to offshore flow tonight into Thursday. Though skies will be awash with high clouds, temperatures will warm to a few degrees above normal through Saturday. A dissipating system will bring rain to the northern half of the district Sunday night into Monday. The second half of next week looks very warm and sunny at this point.
- North-northeast winds of 20-30 mph with gusts to 50 mph across Santa Barbara County and the I-5 Corridor this morning. These winds should end by noon.
- Locally gusty northwest winds of 20-30 mph across the Kern County Mountains this afternoon. Winds slowly transitioning to northeast this evening.
- Northeast offshore winds of 15-25 mph with gusts to 35 mph in Northern Los Angeles and Ventura Counties overnight tonight. Similar windspeeds likely over Orange and San Diego Counties by daybreak Thursday. These winds will slowly decrease Thursday night.
- Temperatures warming into the 40s in the mountains to the 70s in the valleys through Saturday (5-8 degrees above normal).
- Chance of rain beginning Sunday afternoon along the central coast, spreading inland into the rest of Central California Sunday night into Monday. Precipitation amounts may range from 0.50" – 1.00" across the central coast and the Sierras to under a quarter of an inch over Southern CA.
- Sunny, warm and dry weather the second half of next week.
